

Dear PSTCIans & Other Professionals in Central Alberta, I got some new professional friends related to different technical discipline like NDT, Power Engineering, Oilfield services, Process manufacturing, QA, QC, Instrumentation etc. They are planning to help and promote Muslims in their professional field, also for those who want to change or upgrade their skills. For example if you want to change discipline in NDT you can get certification and start new profession in 6 months, Dr Aziz ur Rehman have level 3 in that particular field (only few peoples can do that) and lots of engineers and technicians got success by his guidance and start new reliable profession which is way better than other discipline. That's why I decided to introduce to you so you can get some help from them, and also you can help to guide someone related to your professional discipline. They are also planning to get together in Red Deer so we can discuss different issues who are facing related to recession and other professionals problems. Attachment has detail information. Thanks & Regards, Abdul Majid Khan 1-403-877-3934 Red Deer, Canada.

Professional Guidance Committee (PGC)

Dear Brothers in Islam,
Assalam-O-Alaikum

Past years were quite flourishing for Alberta and a fairly large number of Muslim Professionals with their families have been moved to our community. In some cases, they are not just new to our community, but also are new and Canada and the System of the Country.

Being new, the first obstacle is to get sufficient information about the systems and mechanisms of the land they have chosen as a homeland. As our community, Alhamdulillah has an abundance of professionals, practicing and excelling in their professions, therefore, the first option/solution is to provide the newcomers with the possibility of a broad-based interaction. This interaction will provide newcomers, the guidance and counselling to enter into their background profession and excel.

To achieve this goal in an organized way, we have created a **Professional Guidance Committee (PGC)**, within our community, led by **Dr. Aziz U. Rehman, P.Eng.** For helping brothers in our community, PGC will arrange information sessions, extend support and help in directing brothers in their efforts to pursue their plans and future endeavours.

At this point of time, while extending support to our brothers, the PGC will require the following,

1. Name, contact information and field of expertise for brothers needing assistance
2. Name, contact information and field of expertise for brothers willing to provide assistance.

This will help PGC in arranging and sorting out the needs for channelling them towards available resources and arranging information sessions.

Please feel free in communicating with the following:
